Partnership	Sentry Capital Private Equity Master En-Commandite Partnership
General Partner	Sentry Capital (Pty) Ltd · Registration 2024/388273/07
Regulatory position	Regulated financial services are rendered only within the authorised categories, approved product scope, representative authority and applicable mandate of Al Mabroor Capital (Pty) Ltd t/a AM Capital, FSP 53479. Where applicable, Category I advice and intermediary services remain distinct from Category II discretionary management. What the investor is applying for

A concise, product-specific summary. The approved Short-Form ECP, applicable Series Supplement, accepted SC3 Deed of Adherence, accepted application and final fee disclosure must be read together.

Product / Series	Sentry Dynamic Income · Series B
Access route	Direct private-market participation through the applicable Series, transaction SPV or asset vehicle, with contractual economics and rights defined by the executed documents.
Investment objective	Seek a diversified direct private-market income profile from complementary real-economy operating cash flows after the required scale, controls and liquidity reserves are in place.
Underlying mandate	Opening illustration: 50% traceable Namibia feedlot working capital at a 13% sleeve assumption and 50% tomato-led protected agriculture at a 16% sleeve assumption across Gariep / Rieldans, producing a 14.5% opening blend. Planned opening allocation is approximately R75 million across both access routes; this is planned capacity, not current product AUM.
Investor return basis	14%+ target floor; the 14.5% opening blend is a mandate objective, not a fixed or guaranteed return. It is stated before investor-specific fees and tax unless the executed Product Supplement expressly states otherwise.
Term / availability	Year 3-Year 7. Year 1 and Year 2 are not offered. Applications are considered only while the applicable private-market subscription window is open.
Distribution basis	Illustrations assume reinvestment. Actual distribution frequency, rebalancing and treatment of sleeve cash flows must be stated in the executed Product Supplement.
Minimum contribution	As stated in the accepted Product Supplement or private-offer schedule.
Currency	South African rand (ZAR), unless the executed Product Supplement states otherwise.
Liquidity / withdrawals	Private, term-based and illiquid. No active secondary market or unconditional early redemption is represented. Operating and project cycles may delay cash realisation.
Valuation / reporting	The secure Sentry Capital CRM Client Login gives 24/7 access, subject to authentication, maintenance, availability and legal/security controls, to approved documents, investor statements, available supporting records and applicable weekly, monthly, quarterly and material-event updates. The accepted Product Supplement and route terms govern reporting frequency, valuation method and formal reporting obligations.
Tax status	Investor-specific. No tax result, capital-gains treatment or deductibility is promised. Obtain independent South African and, where relevant, foreign tax advice.

TRACK-RECORD DISTINCTION No independently verified Sentry Series performance record is presented. The underlying operators have sponsor-reported positive operating histories and repeat-cycle evidence; this supports underwriting but is not wrapper performance, audited proof or a guarantee. Return tables remain mathematical illustrations or targets.

Return illustration and market reference

R100,000 illustration before investor-specific tax. It is not a quotation, guarantee or historical performance record.

TERM	MONTHS	ILLUSTRATIVE VALUE	CUMULATIVE RETURN
Y3	36 months	R150 112	50.11%
Y4	48 months	R171 879	71.88%
Y5	60 months	R196 801	96.80%
Y6	72 months	R225 337	125.34%
Y7	84 months	R258 011	158.01%

CALCULATION BASIS The table compounds the 14.5% opening blend for illustration. The published product figure is a target with a plus sign; actual sleeve weights and results can change, and may be lower or negative.

REFERENCE BENCHMARK

Reference comparator	CPI + 8 percentage points
Dated comparator value	12.30% p.a.
Source basis	Reference snapshot: Stats SA headline CPI 4.30% year-on-year for July 2026 plus 8 percentage points = 12.30% p.a. CPI is backward-looking and may change.
Product comparison	14.5% opening blend versus 12.3% comparator: +2.2 percentage points.
Use	Reporting comparator only unless the executed Product Supplement expressly defines it as an objective or hurdle. It does not change the investor entitlement.
Important	The comparator is dated, can move over time and is not a guaranteed return, hurdle or investor entitlement.

What may be charged — and what can go wrong

Current fee assumptions are shown in plain language. The accepted Product Supplement and signed fee disclosure prevail.

ITEM	CURRENT RATE / BASIS	TIMING AND TREATMENT
Initial client fee	1.50% once-off in Year 1	Charged once in Year 1 under the signed client fee disclosure. The signed disclosure records the calculation base, recipient, deduction timing and applicable VAT. No repeat initial fee applies to properly tagged rolled or returning capital.
Ongoing broker fee	0.50% p.a. from Year 2, subject to written client mandate	Ongoing broker/adviser fee from Year 2, only under a written client fee mandate and Record of Advice where applicable.
R100,000 fee illustration	Y1 R1 500 · Y2 R500 · Y3 R500	Illustrates client broker fees only: Year 1 initial fee R1,500; Year 2 onward ongoing broker fee R500 p.a. Tax and any confirmed VAT treatment are excluded.

PRODUCT RISK ASSESSMENT - OVERALL: MODERATE / 3 OF 5

RISK DRIVER	CONTROL POSITION	RISK MANAGEMENT EVIDENCE
Livestock / biological	Residual - monitored	Tag-level records, intake and movement evidence, mortality/disease controls and batch reporting.
Feed, price, weight and offtake	Contract and margin controls	Signed procurement/feeding/offtake terms, stress-tested unit economics and controlled collection.
Crop yield / price / execution	Stage-gated	Pilot gates, signed premium offtake, capex caps, water and operating evidence.
FX / cross-border	Mapped and monitored	Currency mapping, legal structure, payment route and hedging/reserve decision.
Concentration / closed sleeve	Allocation-limited	Allocation and capacity limits; the R25m agriculture sleeve is closed pending a separately approved stage.
Liquidity / direct-vehicle rights	Term-matched	Executed Series/SPV rights, cash controls, evidence-based valuation and gating mechanics.

RISK CLASSIFICATION BASIS Sentry Capital classifies the product risk as Moderate / 3 of 5. Traceability, short feedlot cycles, contracted offtake, crop proof gates, portfolio limits and sponsor-reported positive operating histories reduce exposure. Residual risks include biological and crop performance, climate and water, operator or offtaker default, FX, concentration and illiquidity. This is not an external rating, guarantee or client risk-profile outcome.
